Allen Carr was a chain-smoker for over 30 years. In 1983, after countless failed attempts to quit, he went from 100 cigarettes a day to zero without suffering withdrawal pangs, without using willpower and without gaining weight. He realised that he had discovered what the world had been waiting for – the Easy Way to Stop Smoking – and embarked on a mission to help cure the world's smokers. He is now recognised as the world's leading expert on helping smokers quit. His Easyway method has since been applied to a host of behavioural issues, including disordered eating, anxiety and tech addiction.
