Hilma af Klint 120-Piece Double-Sided Jigsaw Puzzle Set

AF KLINT, HILMA

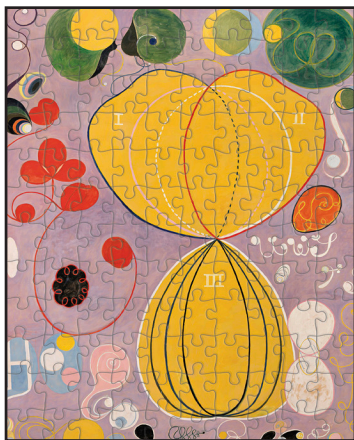

15/09/2024

RRP: \$36.99 Jigsaw

Contains two double-sided puzzles for a total of four images that require minimal space for piecing together.

An artist both of her time and well ahead of it, Hilma af Klint was a rare original. Years before such Modernist pioneers as Piet Mondrian and Vasily Kandinsky dipped their brushes into abstraction, af Klint was breaking ground with colorful, energetic compositions that veered away from the figurative. Influenced by her experiences with Spiritualism, she attempted to reconcile art, science, and religious pluralism through her brilliant paintings. In her lifetime she primarily exhibited her more conventional artwork and ultimately decided that the world wasn't ready for her abstract magnum opus, *The Paintings for the Temple*. She decreed in her will that her work not be shown for 20 years after her death. Over a century after their creation, these masterpieces have garnered international acclaim, and the artist's star is on the rise. Explore the power of originality!

Henri Matisse 120-Piece
Double-Sided Jigsaw Puzzle Set

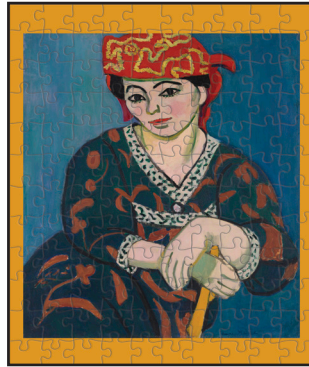

MATISSE, HENRI

15/09/2024

RRP: \$36.99 Jigsaw

PUZZLE 1 – FRONT

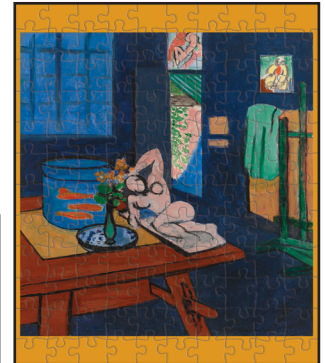

PUZZLE 1 – BACK

PUZZLE 2 – BACK

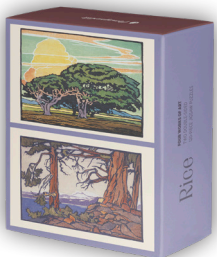

Contains two double-sided puzzles
for a total of four images that require
minimal space for piecing together.

PUZZLE 2 – FRONT

Henri Matisse brought a thoroughly modern eye to his classical art foundations. The result was a daring new style that pushed the boundaries of Modern art and helped Matisse become one of the defining artists of the 20th century. His pairing of simple, familiar subject matter—portraits, still lifes, nudes, and intimate domestic scenes with flat planes of unbridled color, bold use of line, and innovative forms ensures that Matisse's works continue to captivate audiences to this day. The four paintings reproduced here are in the collection of the Barnes Foundation in Philadelphia and Merion, Pennsylvania.

William S. Rice 120-Piece
Double-Sided Jigsaw Puzzle Set

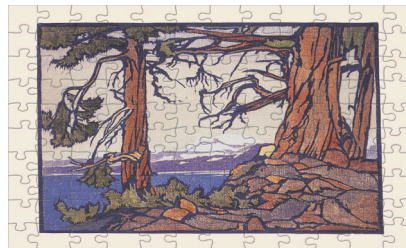

RICE, WILLIAM S.

15/09/2024

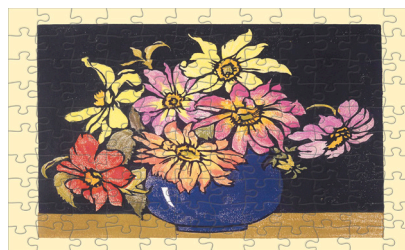

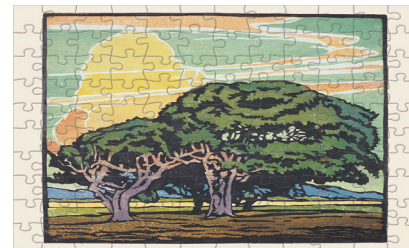

RRP: \$36.99 Jigsaw

PUZZLE 1 – FRONT

PUZZLE 2 – FRONT

PUZZLE 1 – BACK

PUZZLE 2 – BACK

Early in the 20th century, William S. Rice established his reputation as an artist and teacher in Northern California where he found abundant inspiration in the natural landscape. In the San Francisco Bay Area, he connected with colleagues who embraced the Arts and Crafts movement, which united enthusiastic and diverse groups of craftsmen, artists, architects, writers, economists, educators, and others. They strove for simplicity in their work and turned away from the assembly-line approach of increasing industrialization, endowing labor with dignity by mastering every step in the making of their projects. In this spirit, Rice created his block prints, accomplishing the entire process: designing, then carving the blocks, and finally printing them. The four block prints reproduced here include two of Rice's famous landscapes and two florals showcasing a softer side of his woodblock printmaking.

I Am Wild Flash Cards

HARPER'S, CHARLEY

15/04/2024

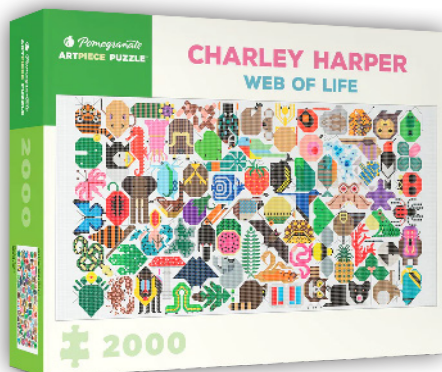

RRP: \$36.99 Cards

What has pink feathers and long legs? Which creature carries its house on its back? Which furry forager wears a mask? Charley Harper's I Am Wild Flash Cards teach youngsters to recognize wildlife—in the sky, in the ocean, in America's national parks, and even in backyards and urban areas. With Harper and his Midcentury Modern animals, kids will learn to spot a flamboyant flamingo, a tremendous turtle, and a rascally raccoon—among 50 different critters in all—while building vocabulary and memory skills. An information booklet adds to the entertainment and education value, with habitat notes about where various creatures call home.

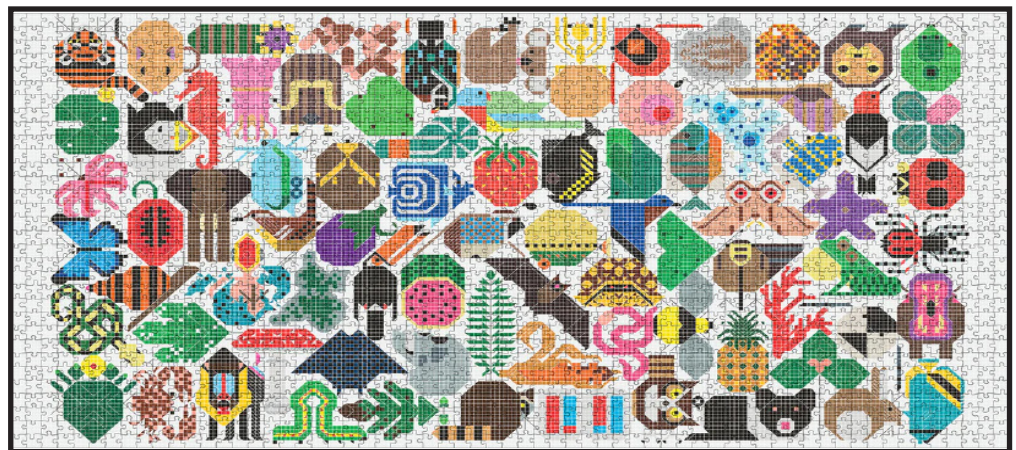

Charley Harper: Web Of Life (2,000 Piece Puzzle)

HARPER, CHARLEY 15/10/2021

RRP: \$54.99 Jigsaw

Charley Harper (American, 1922–2007) Web of Life, 1986 From cardinal to chili pepper, cowfish to cyanobacterium, Charley Harper's Web of Life brings together 81 interconnected life-forms in a colorful homage to the biological sciences. Worked in his signature minimal realism style, this celebrated ceramic tile mural is showcased within Pearson Hall, a sciences hub on the campus of Miami University, Oxford, Ohio. Harper, a wildlife artist as well as a lifelong naturalist and conservationist, said, "I regard the picture as an ecosystem in which all the elements are interrelated, interdependent, perfectly balanced ... in a world of chaos, the picture is one small rectangle in which the artist can create an ordered universe." Harper's entire mural, made of thousands of small tile squares, is reproduced on the included key. All of the identified species are depicted on this delightfully challenging 2000-piece jigsaw puzzle.
